

This listing of claims will replace all prior versions and listings of claims in the application:

### **Listing of Claims**

Claim 1 (currently amended). A textured article comprising:  
a substrate having at least two surfaces; and  
raised elements on at least one surface of the substrate, wherein the article is useful for providing skin or hair care benefits; wherein (i) the substrate is selected from the group consisting of a woven fabric, a knit fabric, a nonwoven fabric, a laminate of a fabric and a polymeric film, a flocked fabric, and combinations thereof; (ii) the substrate has a basis weight ranging from about 20 grams per meter to about 500 grams per square meter; and (iii) the discrete raised elements have a diameter ranging from about 0.5 mm to about 3 mm; and the substrate is loaded with a composition selected from a skin care composition and a hair care composition.

Claim 2 (Previously Canceled). The article according to claim 1 wherein the substrate is selected from the group consisting of a woven fabric, a knit fabric, a nonwoven fabric, a laminate of a fabric and a polymeric film, a flocked fabric, and combinations thereof.

Claim 3 (original). The article according to claim 1 wherein the raised elements are formed from hot melt coatings comprising a polymer selected from the group consisting of olefin polymers, block copolymers, and combinations thereof.

Claim 4 (original). The article according to claim 3 wherein the hot melt coating comprises from about 15% to about 100% olefin polymer or a block copolymer, from about 0% to about 60% tackifying resin, and from about 0% to about 50% wax.

Claim 5. The article according to claim 1 wherein the raised elements are discrete and are in a shape selected from circular dots, hexagons, hearts, diamonds, rectangles, stars, and triangles.

Claim 6 (Previously Canceled). The article according to claim 2 wherein the substrate has a basis weight ranging from about 20 grams per meter to about 500 grams per square meter.

Claim 7 (original). The article according to claim 5 wherein the discrete raised elements cover from about 10 percent to about 90 percent of the surface of at least one side of the substrate.

Claim 8 (Previously Canceled). The article according to claim 6 wherein the discrete raised elements have a diameter ranging from about 0.5 mm to about 3 mm.

Claim 9 (original). The article according to claim 6 wherein the discrete raised elements have a height greater than about 0.01 mm as measured from the surface of the substrate.

Claim 10 (original). The article according to claim 1 further comprising a skin or hair care composition.

Claim 11 (currently amended). A method of providing an exfoliating wipe comprising:  
providing a substrate selected from the group consisting of a woven fabric, a knit fabric, a nonwoven fabric, a laminate of a fabric and a polymeric film, a flocked fabric, and combinations thereof;  
and pattern coating raised elements onto the substrate utilizing a hot melt coating selected from the group consisting of olefin polymers, block copolymers, and combinations thereof; and loading the substrate with a composition selected from a skin care composition and a hair care composition..

Claim 12 (original). The method according to claim 11 wherein the pattern coating is applied by a method selected from hot melt rotary screen coating and hot melt gravure coating.

Claim 13 (original). A method for cleansing the skin or hair comprising topically applying the article of claim 1 to said skin or hair.

Claim 14 (original). The article of claim 1 wherein the article is in the form of a dry or wet wipe.

Claim 15 (original). A method for cleansing exfoliating or massaging the skin comprising topically applying the article of claim 1 to said skin.
